Subject: Nafion BP2 - carboxylic acid form

Guys,

Nadine said she detected this compound in blood samples, and that you may have also seen it in water samples. If you have seen it in water samples, do you know in which ones and whether these were collected before or after June 2017? We have some May 2017 samples from the Cape Fear River as well as older Huske Dam samples. Was it present in these, Zack?

Best,
Detlef
